Duplicate Analysis

Metric	Value
Exact Duplicate Rows	60
Duplicate Emails	114
Duplicate Ratio	6.0%

Missing Values

Metric	Value
Total Missing Values	148

Top Affected Column	Missing Values
date_of_birth	88
password	32
address	18
contact_number	10
email_address	0

Special Characters

Metric	Value
Columns Containing Special Characters	2
Flagged Character Rows	73

Column	Type	Affected Rows	Special Chars	Emojis
address	address	30	45	0
notes	generic	43	28	3

Column Risk Ranking

Rank	Column	Risk Level	Primary Issue	Risk Score
1	date_of_birth	Low	Invalid Dates	10
2	email_address	Low	Invalid Emails	5
3	contact_number	Low	Invalid Phone	3
4	password	Low	Missing Values	1
5	address	Low	Missing Values	1
6	notes	Low	Special Characters	0

Recommendations

- Clean invalid dates.
- Review invalid email addresses.
- Standardize invalid phone numbers.
- Correct invalid name values.
- Remove duplicate rows.
- Review duplicate email records.
- Review missing values in the most affected columns.
- Standardize special characters and emojis where unexpected.
- Review low uniqueness columns for duplicate-value risk.
